PROFESSIONAL SUMMARY

Detail-oriented and analytical BSc Information Technology student with a strong interest in data-driven thinking and understanding how systems function as a whole. Highly observant, focused, and goal-driven, with the ability to analyse challenges from multiple perspectives and adapt effectively to different roles and environments. Passionate about learning the underlying principles of cybersecurity, system architecture, and how data moves and is processed within digital systems. Particularly interested in management-oriented roles, with a strong preference for logical thinking, problem-solving, and guiding others in structured learning environments.

SKILLS

Technical Skills

- Programming: Java, C#, Python (basic), C++
- Databases: SQL, relational database design, Oracle SQL
- Data Analysis: Excel, statistical analysis, data visualization
- Systems: Systems analysis, system design, process modelling
- Networking: OSI model, basic network configuration
- AI Concepts: First-order logic, AI agents, knowledge representation
- Optimization: Linear programming, simplex method, decision systems

Soft Skills

- Analytical thinking
- Problem-solving
- Communication (written & verbal)
- Attention to detail
- Independent working style

EXPERIENCE

Academic Projects

- **Panda Note (Mobile App, C#):**
Developed a note-taking application, implementing functionality for creating, editing, and organizing notes.
GitHub: [Janelle42/Panda-note-app-: App build in visual studio using c#and xaml](#)
- **Team System Development Project (SQL & Visual Studio):**
Built a full IT system from scratch, including process modeling, system design, and database management.
GitHub: [Castleman07/Group50_CMPG223_Justice_System: Cmpg223 Group project](#)
- **Data Analytics Assignments:**
Performed statistical analysis and data visualization using Excel.
- **Podcast & Video Essay (Business Communication & Ethics):**
Produced content demonstrating research, communication, and presentation skills.
- **Network Design & VLAN Configuration (Academic Project)**
Designed and configured a VLAN-based network to segment functional areas including switch configuration, port assignment, and IP addressing, and simulated and tested the network using Cisco Packet Tracer.
GitHub: [Janelle42/Network-assignment-: Build a network on 3separate areas using packetracer](#)
- **Artificial Intelligence & Python Development**
Gained hands-on experience in AI using Google Teachable Machine and Python, including data generation, manipulation, and visualisation with NumPy, scikit-learn, and Matplotlib. Applied first-order logic (FOL) to develop rule-based systems and built an interactive chatbot, while working in Google Colab and Spyder.
- **Database Design & Development (Real Estate System – Group Project)**
Designed and built a relational database for a real estate agency system using data modelling principles and Oracle SQL, focusing on structured data storage, table creation, and efficient data management.

Portfolio (Projects & Work):

<https://drive.google.com/drive/folders/1SCHG3BtyjU1Znde711PhveSPNwlpKvcu?usp=sharing>

Leadership & Committee Experience

- Organized and managed stalls for campus events, including a cybersecurity-focused stall.
- Assisted at social events, including bar operations, handling (selling refreshments) cash and managing transactions, and ensuring regulatory compliance.
- Represented Bellatrix Day House in various activities and events.
- Created cultural art projects and led campus tours, improving engagement and communication skills.

Peer Academic Support(PAL) North-West University (NWU)

2026 – Present

- Provide tutoring and academic support to students
- Conduct Microsoft Teams sessions for remote learners
- Assist with marking and assignment guidance
- Support study planning, exam preparation, and concept understanding
- Act as communication link between students and lecturers

EDUCATION

North west university , North west Potchefstroom - BSc

Information technology

Expected completion: End 2026

- Programming (C# , Python, Java, C++)
- Databases & SQL
- Systems Analysis & Design
- Cybersecurity fundamentals
- Data Structures & Algorithms
- Artificial Intelligence basics
- Computer Networks
- Decision Support Systems

Hoër Tegniese Skool , Mpumalanga Witbank - National Senior

Certificate

January 2018 - December 2022

AWARDS

Best Committee Member, 2025 – Recognized for outstanding leadership and contributions to Bellatrix Day House Committee

Committee Participation Certificates, 2023 & 2024 – Acknowledged for active involvement and commitment

Matric Poetry Award, 2022 – Received certificate for poetry presentation/performance

2nd Place – Long Distance Running, High School – Demonstrated discipline, perseverance, and commitment in athletics.

INTERESTS

- Systems thinking, design, and problem-solving
- Creative application development and UI/app design
- Cybersecurity concepts and digital systems
- Artificial Intelligence and emerging technologies
- Data and technology in real-world applications
- Academic mentoring and communication
